

What makes our location geographically IDEAL?

- Within a day's drive of 75% of the US population
- Strategically close to major 3PL hubs
- Reduce supply chain complexity

What makes our facility

STATE-OF-THE-ART?

- A new low relative humidity primary packaging suite which maintains 6% RH at 70 degrees Fahrenheit
- New serialization and aggregation equipment on our primary and secondary lines
- Larger cold chain storage capacity and DEA Cage for Schedule III-V Drugs
- Key card access, surveillance cameras and 100% gated property are part of an advanced security system
- Our well trained staff, up-to-date equipment, standard operating procedures and regulatory approved processes

Why are we a

STRATEGIC CHOICE

for our customers?

- It's simple – our project management team goes above and beyond every day to make sure your order gets the special attention it deserves.
- Turn key approach which begins with package design and engineering services
- Meeting special requirements like cold storage, retain storage, Rest-of-World (RoW) packaging, Bright stock labeling and more
- Serialization and Aggregation Ready, GDUFA Compliant
- Responsive, high-touch service combined with a cost efficient system
- Speed to market makes your supply chain efficient and helps patients get needed medicine faster

What major services do we
OFFER?

BLISTERING & BOTTLING

Blisters available in large or small formats; thermoformed, heat-sealed or cold formed; HUD; multiple product fill; stability batches; child-resistant or compliance unit-dose designed; various lidding materials; preprinted foil

Bottling filling available in various bottle sizes with run size flexibility; child-resistant, twist off or snap on closures; neck-banding; cartoning or shrink wrapping; stability batches; slat filling or electronic counting. State-of-the-art climate control, positive pressure filling suites for both blistering and bottling.
